DrayFleet TMS for High-Volume Drayage Carriers
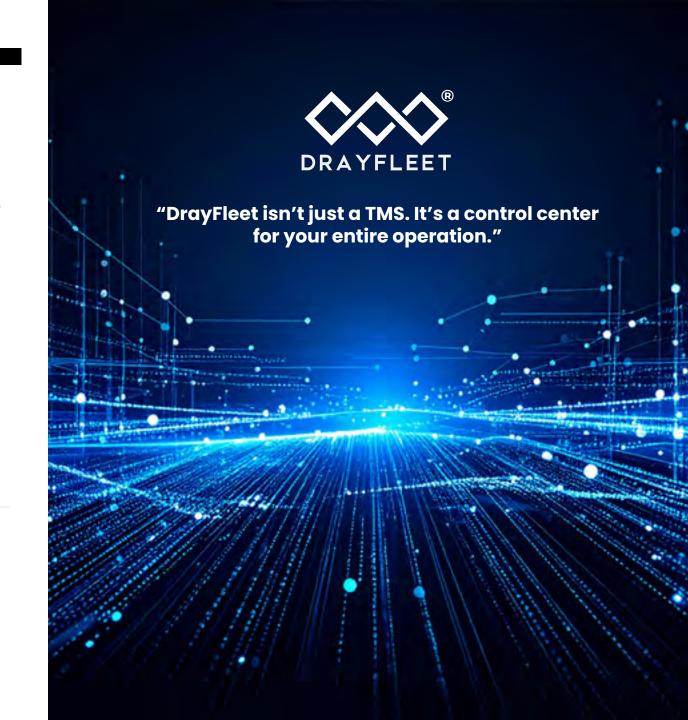

Built for Agility. Designed with Integrity.

Unlock the Power of Your Data with DrayFleet

In today's fast-paced transportation industry, data isn't just information—it's your competitive edge.

- ✓ **Automated Rating & Contracts**
- ✓ **Track & Trace**
- ✓ **Driver Mobile App Integration**
- ✓ **Scalable Change Management**

DrayFleet® is a cutting-edge drayage management system from DrayData that empowers logistics leaders with the real-time insights and automation needed to drive efficiency, scalability, and profitability.

DRAYFLEET

"DrayFleet isn't just a TMS. It's a control center for your entire operation."

Featured Highlights

Robust Tools to Power High-Volume Trucking

DRAYFLEET®

Powerful Rating & Contract Automation

Flexible rating engine, FSC/DOE integration.

- Apply customizable free time rules and contract-based allowances.
- Automatically generate rates with our flexible rating engine.
- Supports dynamic DOE (Department of Energy) fuel surcharges for real-time accuracy.

Flexible Connectivity Options

EDI, API, RPA-ready.

- Streamline data exchange via EDI, API, and OTW file uploads.
- Seamless system integration with shippers, brokers, and 3PLs.

Granular Track & Trace

SLA visibility, internal + external planning.

- Real-time visibility for both internal operations and external partners
- SLA tracking to ensure compliance and service transparency.
- Enables accurate planning and optimized resource allocation.

Driver Mobile App Integration

- Real-time updates from the road with available mobile devices.
- Enhanced visibility into driver progress, exceptions, and compliance.

Agile Change Management

- Make mass updates quickly across large datasets.
- Add or edit critical shipment and operational data in just a few clicks.

Comprehensive Asset Maintenance Tracking

- Manage tractor and chassis maintenance, repair schedules, and tag expirations.
- Monitor asset utilization and performance with real-time P&L tracking.

Built for Onboarding Speed and Execution

We're with you every step of the way

DRAYFLEET®

Smart Configuration

- **Assets** – Chassis, gensets, trailers
- **Resources** – Drivers, owner-ops, tractors
- **Locations** – Customers, ports, depots
- **Rules** – Per diem, overweight, demurrage

User & Role Management

- **Multi Companies** – Parent orgs, terminals
- **Users** – Role-based views, audit logs
- **Compliance** – Chassis, DOT, tractor coverage

Built to Integrate

- **Connect to:** TMS, ERP, Accounting, Fuel Cards
- **API/EDI support**
- **RPA Injection:** Skip manual entry — data auto-updates your platform

Control starts with visibility.

But real power comes from integration. DrayFleet plugs into your platform, your process, and your people.

White-Label Ready

Your Brand, Our Platform—Built for Enterprise

DRAYFLEET®

Brand consistency
Maintain a professional, fully branded platform

Cost savings
Avoid the high costs of developing, maintaining, and updating enterprise-level TMS while still gaining access to advanced logistics technology.

Rapid Deployment
Leverage pre-built building blocks to quickly generate custom functionality, minimizing development time and accelerating implementation.

Community Support
Rely on dedicated support teams and enjoy ongoing updates from industry experts without the wait

Enhanced Business Focus
Utilize resources where they matter most...dealing with exceptions and focus on the customer needs. Leave the problem definition and solutions to us!

Scalable & Tailored to Your Operations
Customize your TMS to match your unique workflows, billing structures, and reporting needs. With modular features, the system grows and adapts with your business, ensuring long-term efficiency.

Built-In Support Components

DRAYFLEET ®

ELDS Integration
Integrate HOS and Odometer reading program

Tracing
SSL BOL, vessel, container availability, gate activity and Class I and Class II trailers

EDI
EDI, API, AS2

Mobile Comm
Tablet based server driver communications, automatic time stamps

Customer PowerBi Reporting
Visuals, live and on demand reporting, data health reporting

DrayScheduler
Port appointment system

DrayData Company

Delivering Data Driven Tools

DRAYDATA ®

Our Focus

DrayData brings together visibility and container transportation management into one powerful platform, giving drayage stakeholders the tools they need to succeed. By connecting visibility across every stage of the container lifecycle—movement, idle staging, and documentation—we eliminate blind spots, reduce friction, and strengthen operational control. Our tailored solutions are built by logistics experts to integrate seamlessly with your existing systems, ensuring clarity, speed, and measurable results.

Why Choose DrayData

DrayData empowers drayge leaders with end-to-end lifecycle visibility and proactive landside management—so you're not just tracking containers, you're controlling outcomes. With over 25 years of logistics-first innovation, our solutions are purpose-built to streamline complex container operations, delivering the clarity, precision, and control your supply chain demands.

✔ 150+ EDI Partners

✔ Port, Rail, and Depot Coverage

✔ 25+ Years of Logistics Innovation

DrayData was built for scale. We combine deep industry knowledge with flexible tech so our customers can grow without outgrowing their systems.
